

Harp.js & Surge

Harp & Surge

- The role of a Web Server
- The Harp.js Server
- The Surge.sh Deployment service

The Role of a Web Server

- A Web Server is a program which is 'listening' on a particular 'Port' for HTTP Requests
- When a request is received, the server determines if the request can be 'served'
- If it can, then the server packages up a response and sends it
- Requests are generated by browsers (usually), either by:
 - The user entering a url in the address bar of the browser
 - Or the user clicking on a link on a page

Harp.js

- For professional web site development, you need a local web server. Otherwise, the site you develop will not be sufficiently tested.
- Harp.js is a web server you can run on your own computer.
- It behaves exactly like a web server used by a hosting company
- You can use it to simulate how your page will behave when it is eventually deployed to a server
- Additionally - the web server can provide a range of additional features you can use in your web development

harp

Documentation

The static web
server with built-
in preprocessing.

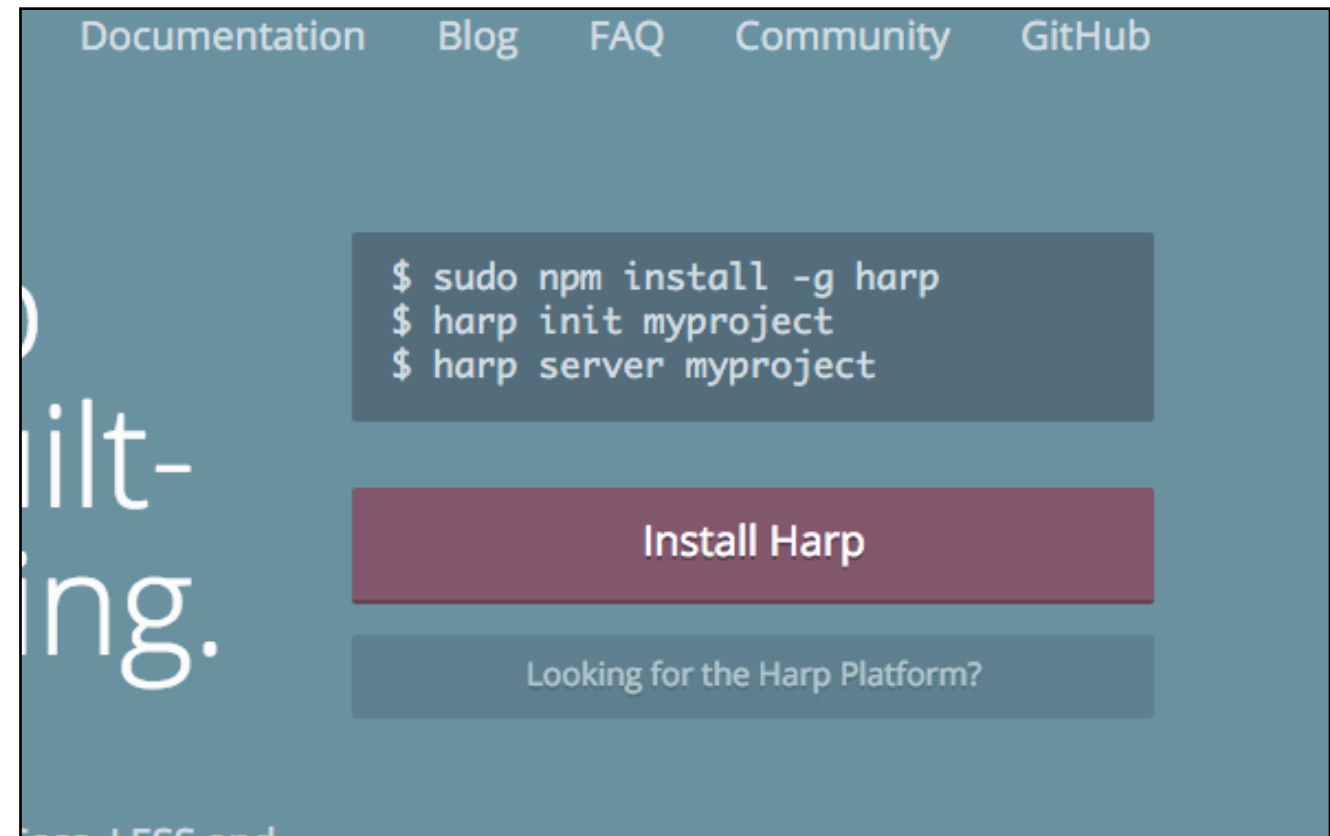

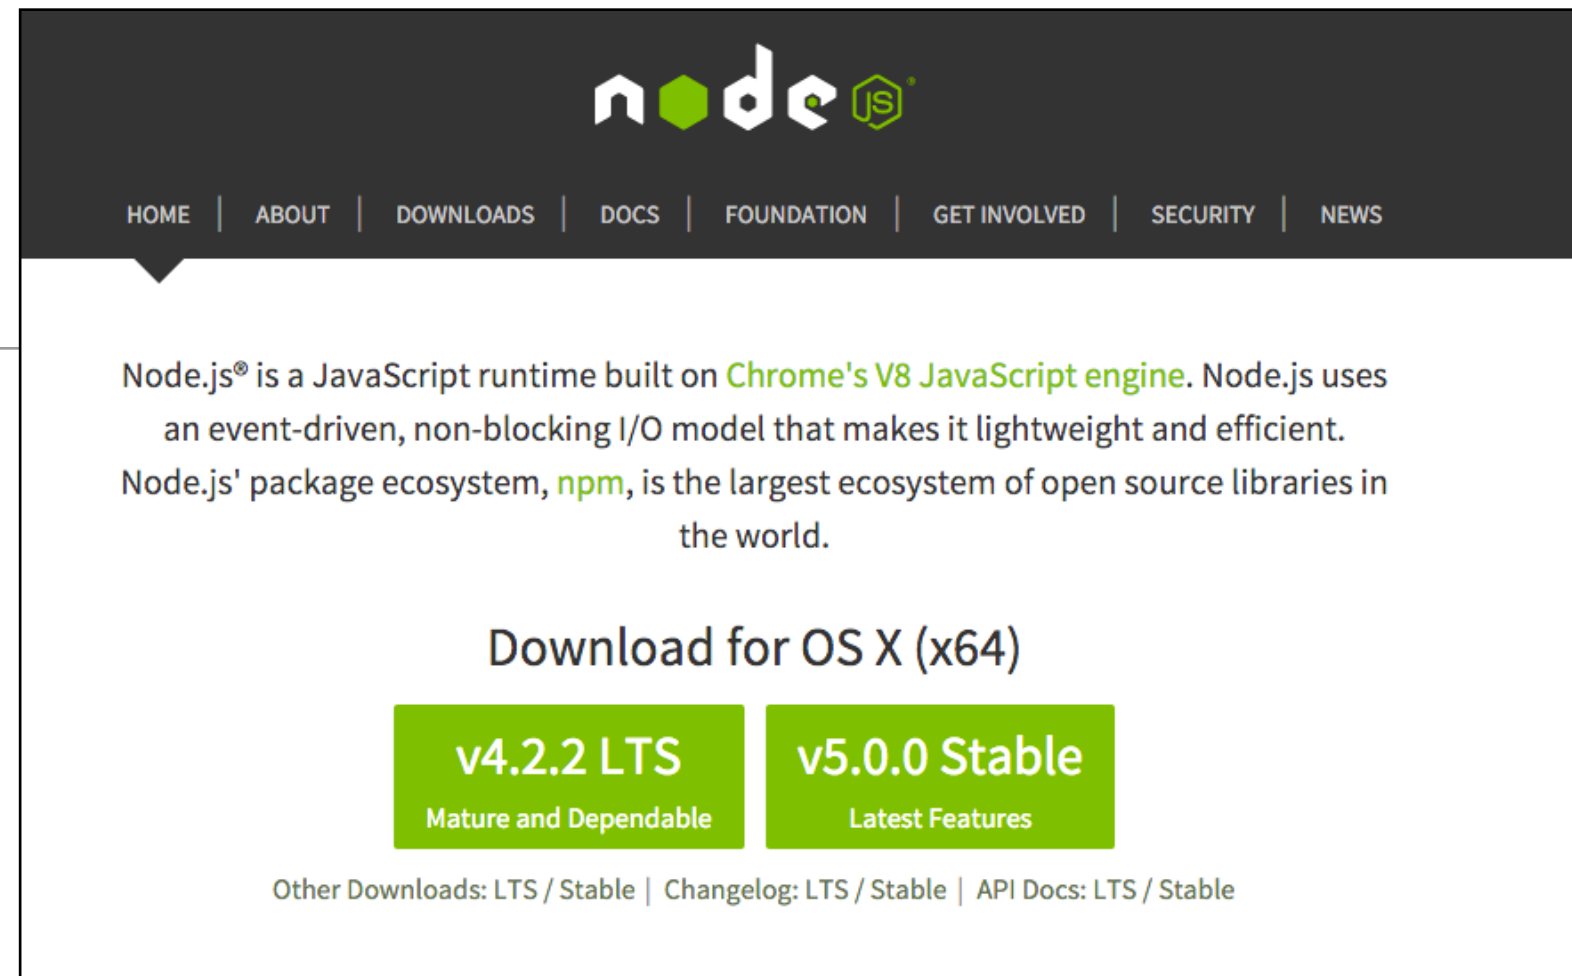

Harp serves Jade, Markdown, EJS, CoffeeScript, Sass, LESS and Stylus as HTML, CSS & JavaScript—no configuration necessary.

Follow @HarpWebServer

Star Harp on GitHub

Installing Harp

- On your own machines:
 - First install Node.js
 - Then Install Harp

In Walton

- Follow instructions in Lab-08
- This will allow you to download prepackaged version of harp that will work on the Walton Labs

Lab-08

Deploy anything in six keystrokes

There's only six keystrokes between you and deployment: Type `surge` and hit `enter` in your project directory to get it online immediately.

```
$ npm install --global surge
$ surge

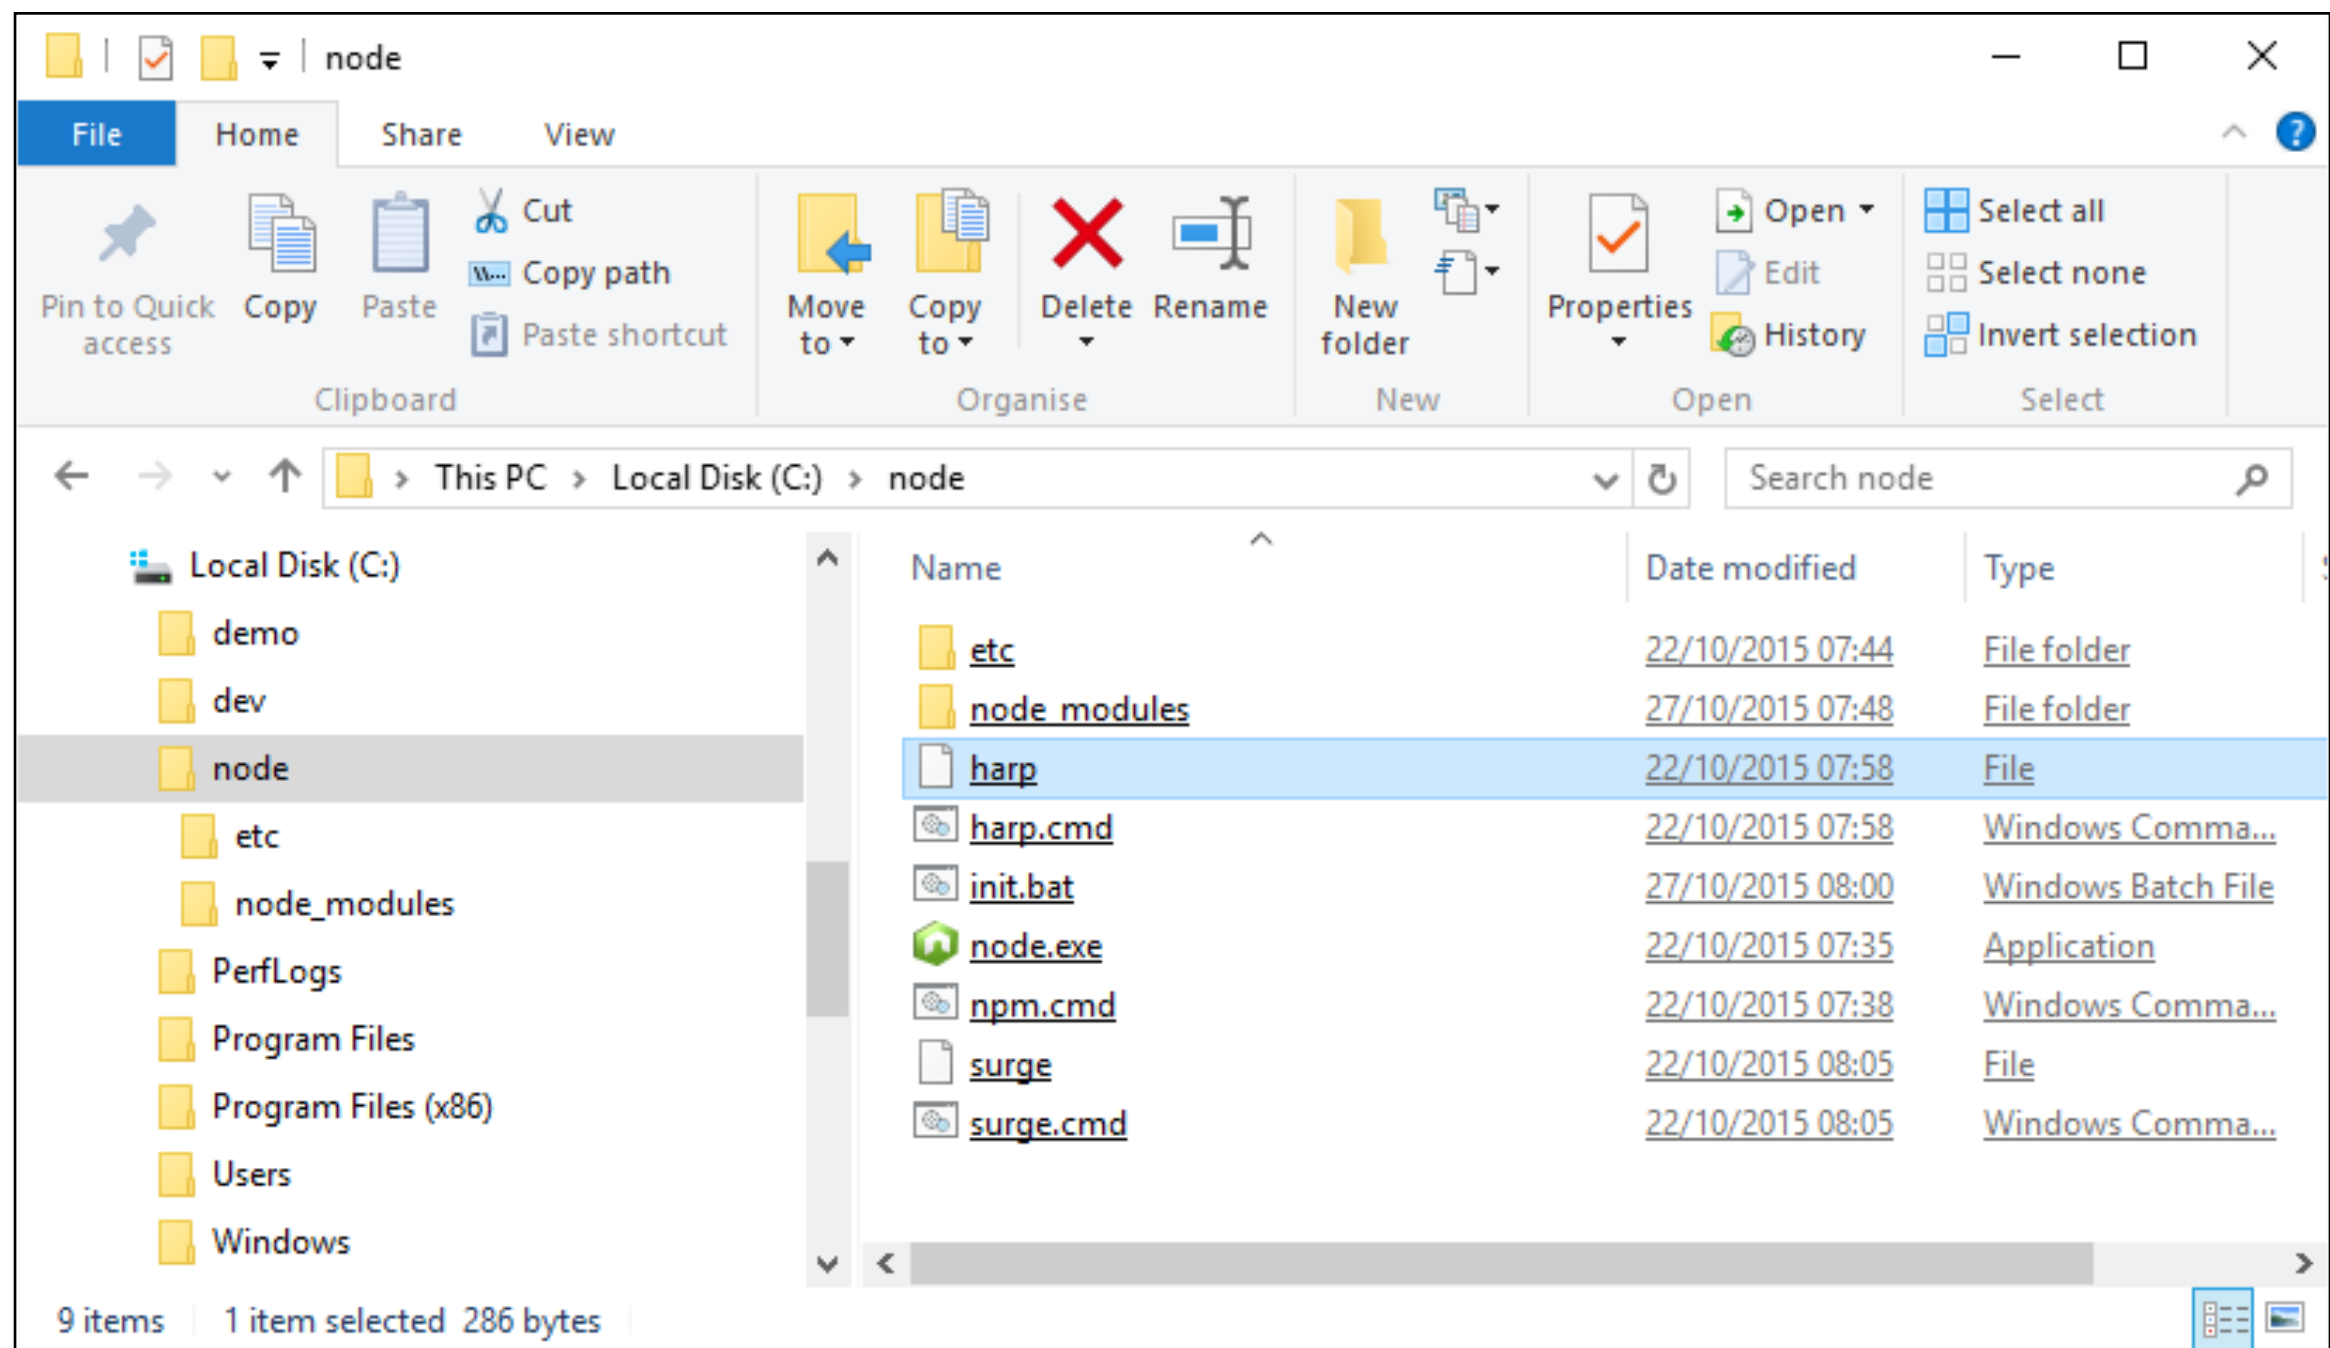

project: path/to/my-project
domain: my-project.surge.sh
upload: [*****]

Success! Published and running at my-project.surge.sh
```

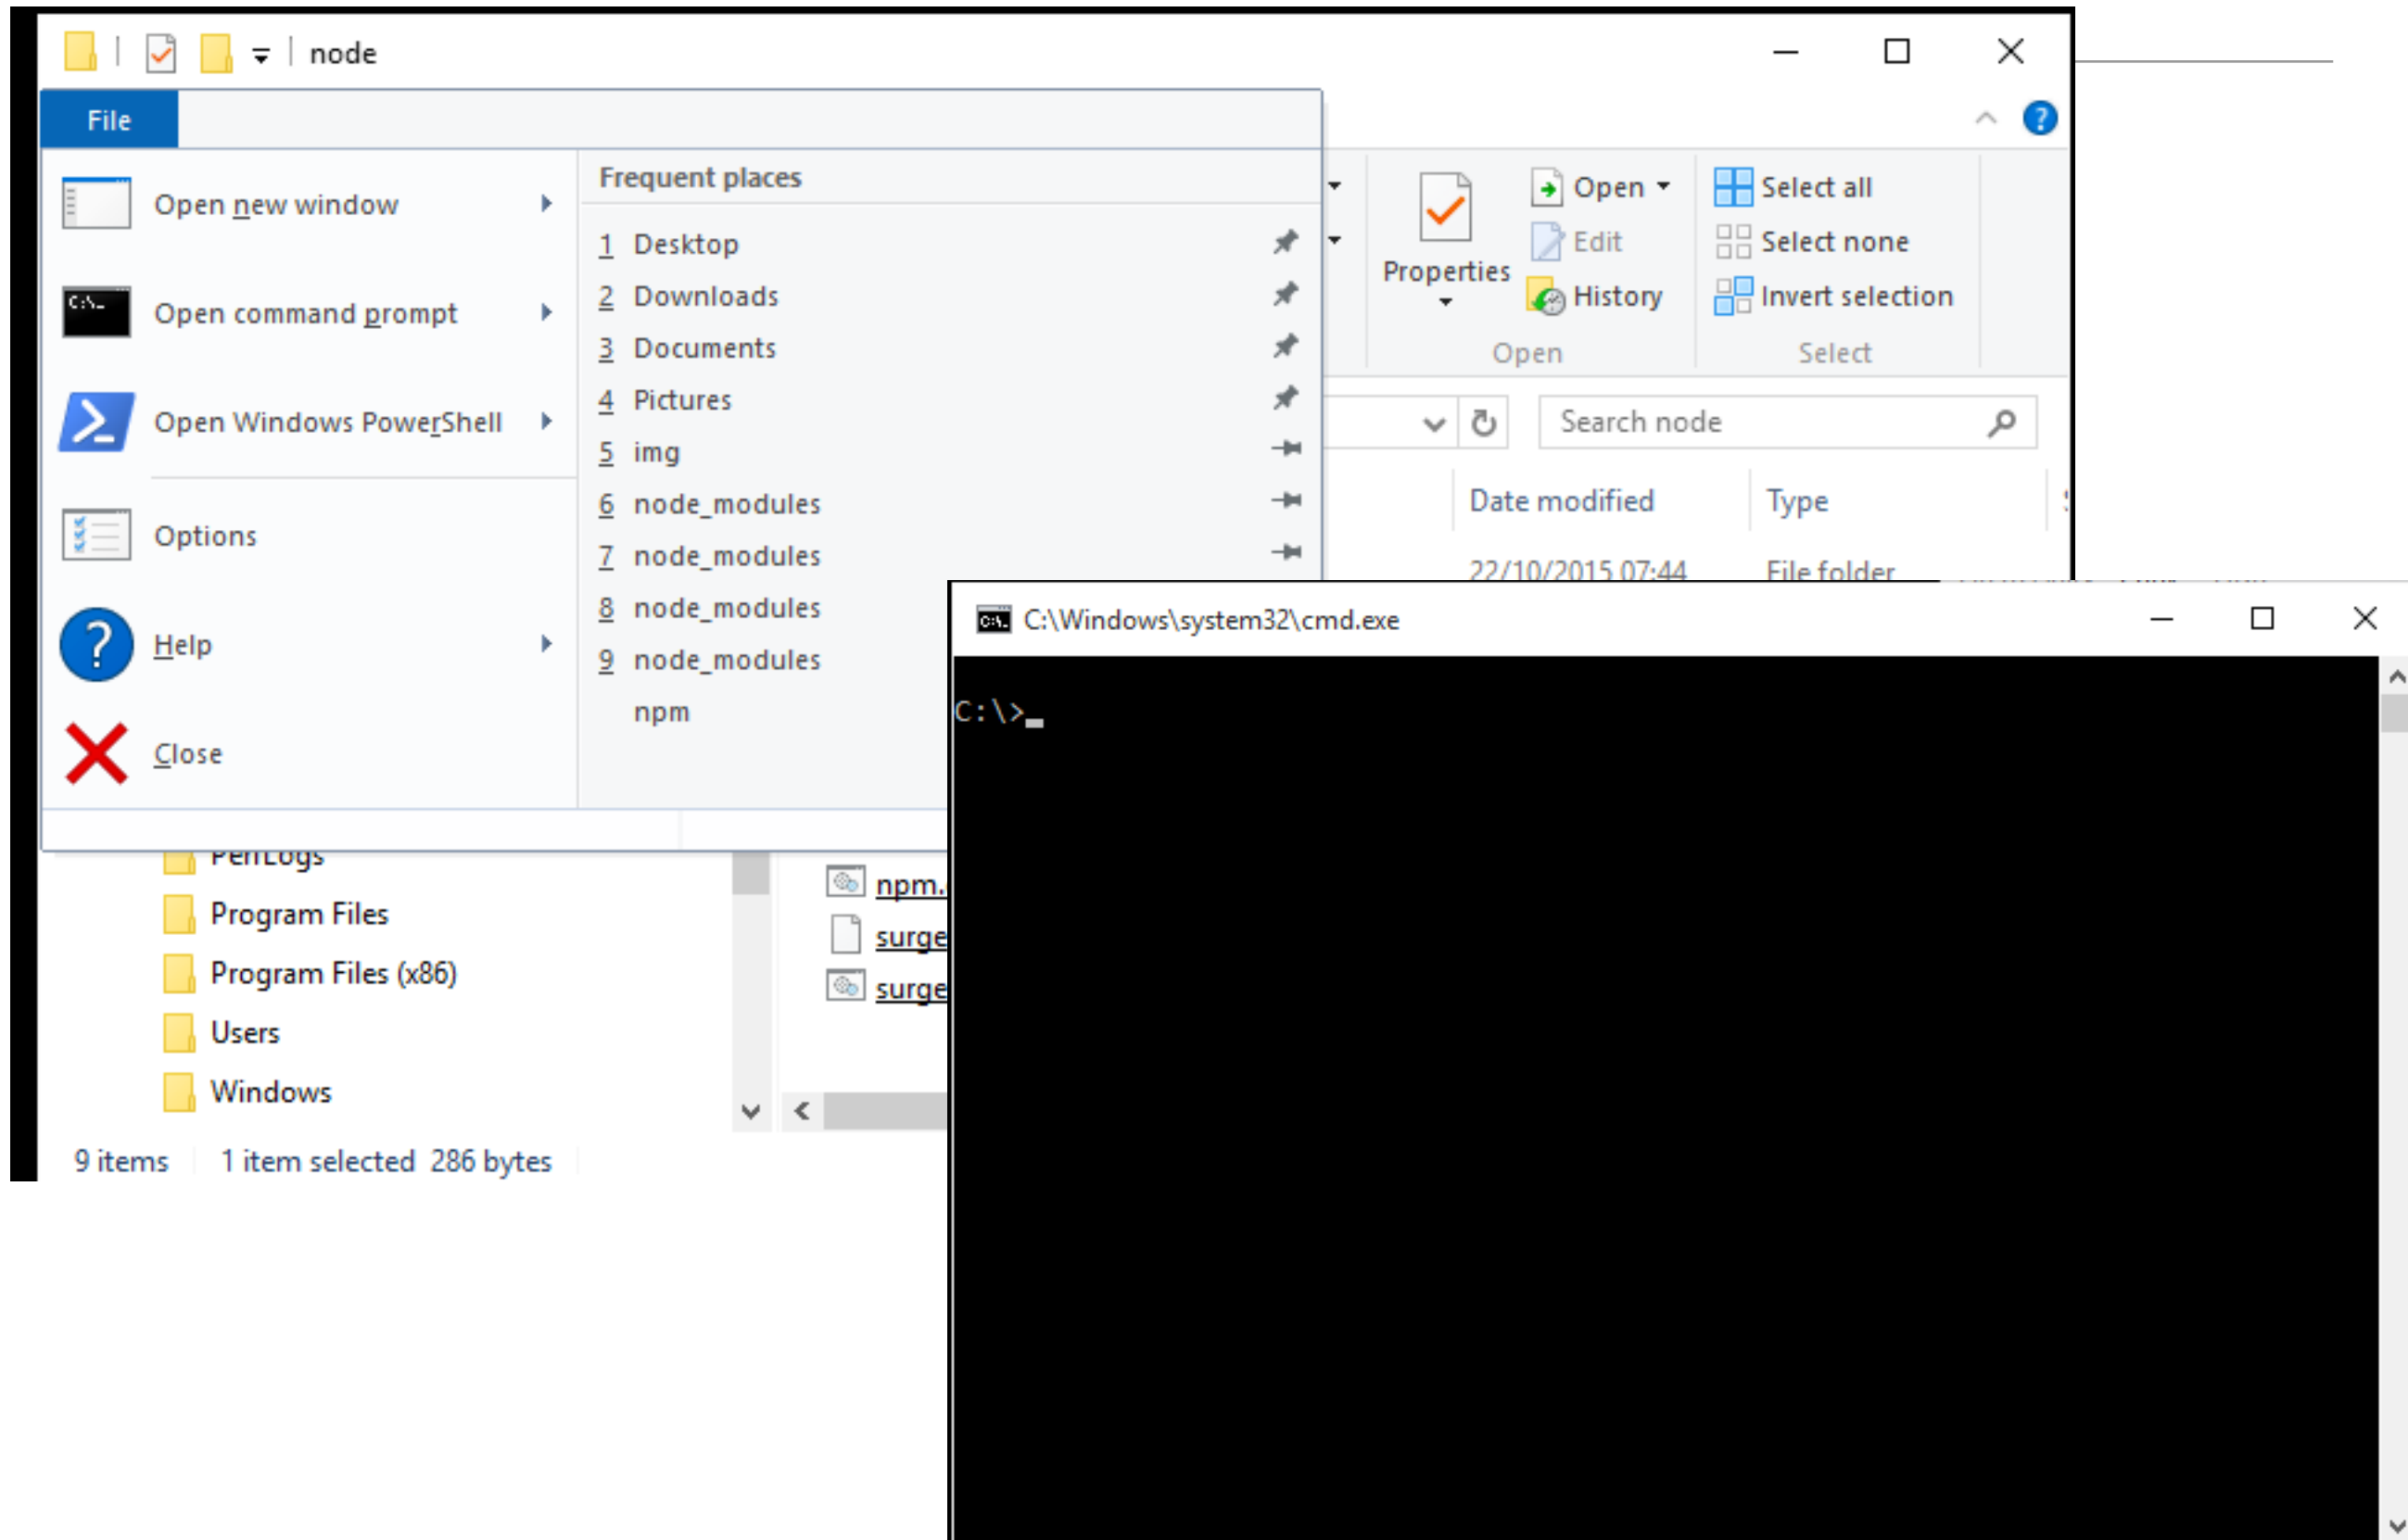

Install software tools to serve a web site locally and also to deploy the web site to a public web server.

Lab-08 - download

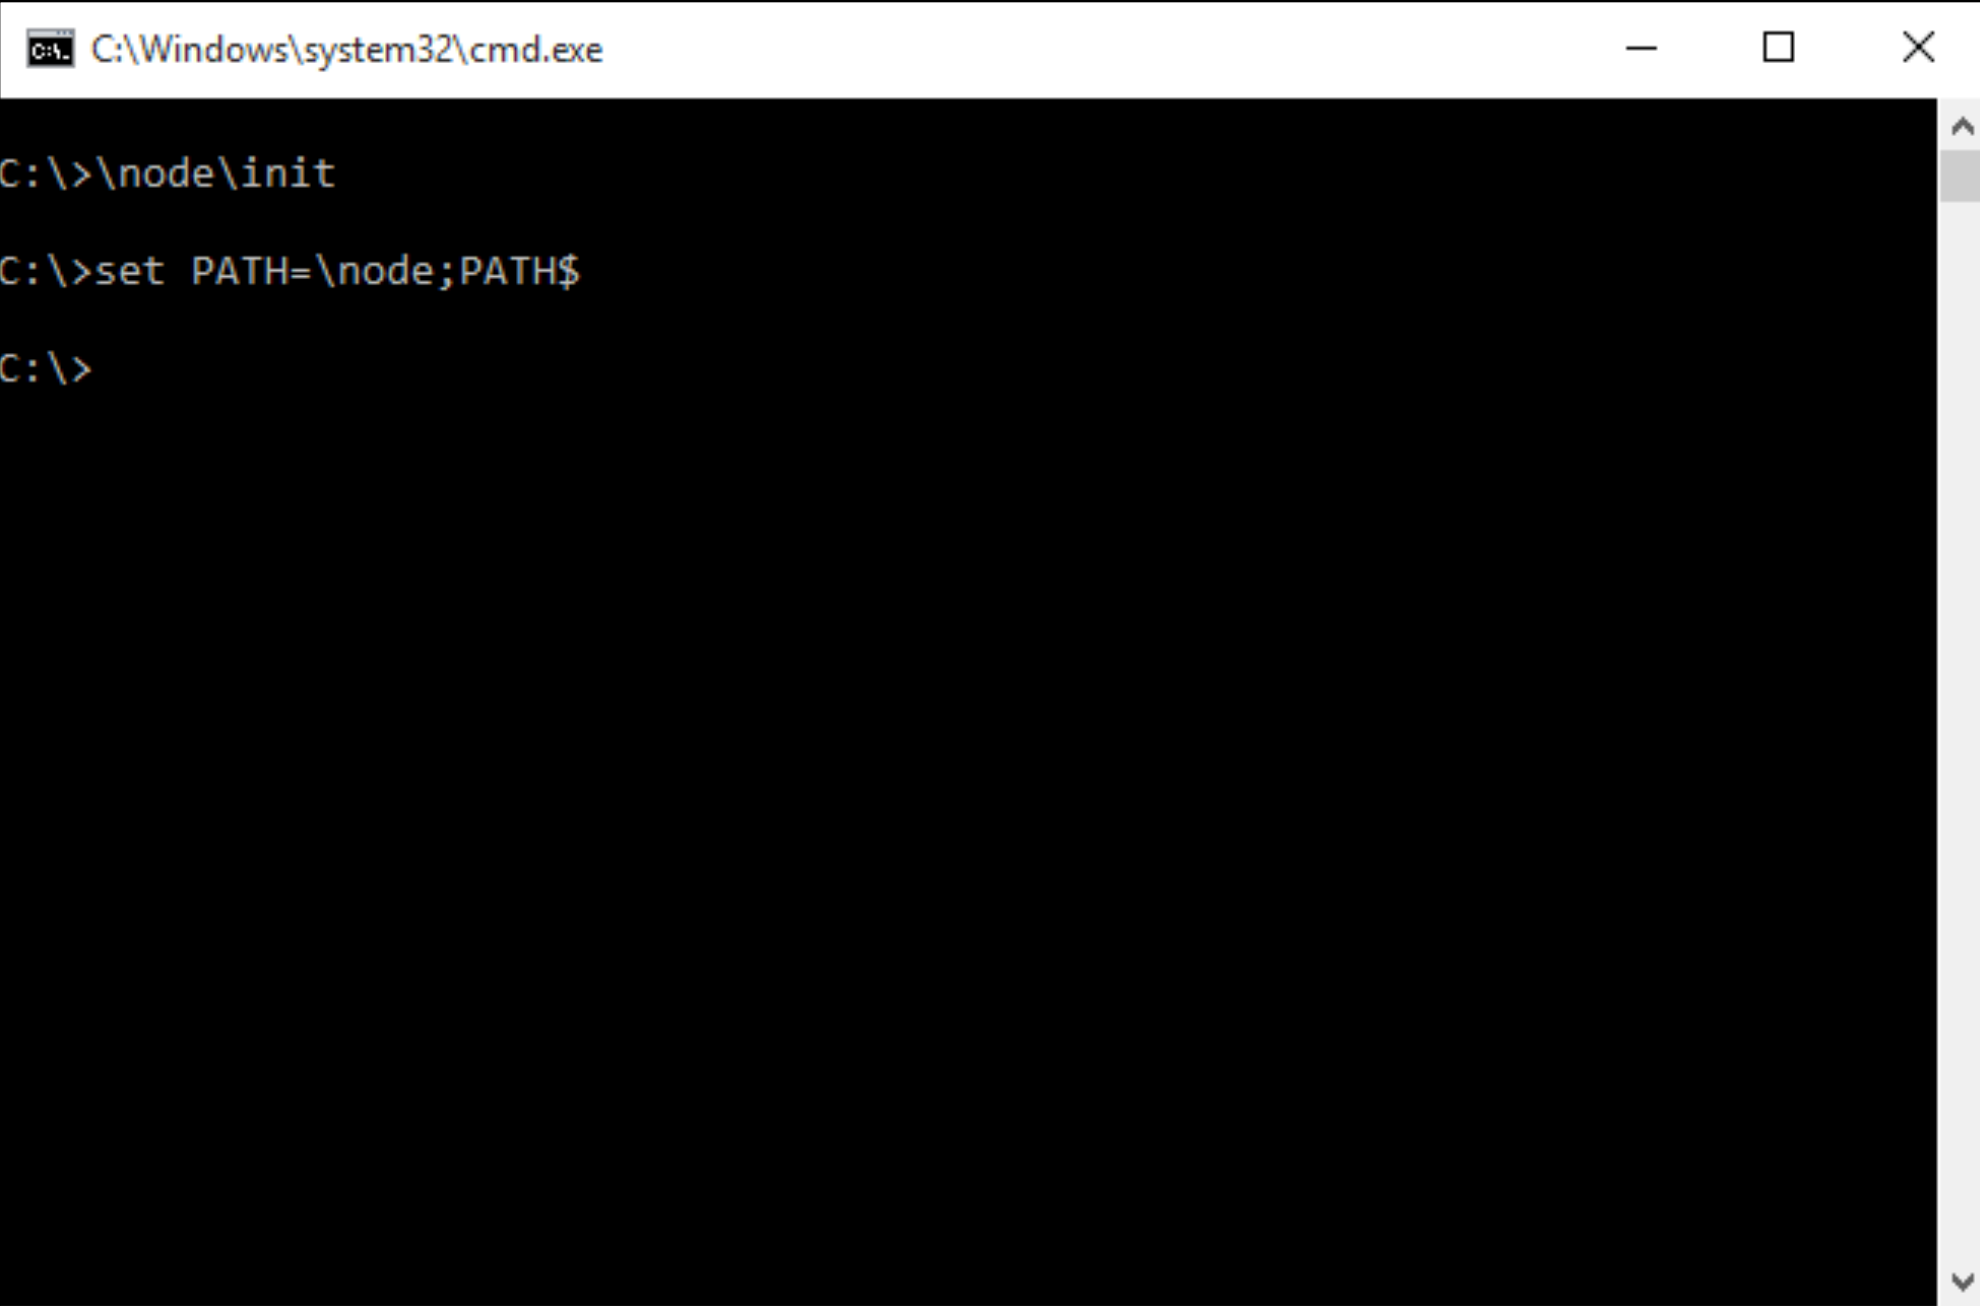

- Download and Expand 'node.zip' only your G: drive

Run a Command Prompt

Initialise Node

```
C:\Windows\system32\cmd.exe

C:\>\node\init

C:\>set PATH=\node;PATH%

C:\>
```

The screenshot shows a Windows command prompt window with the title bar 'C:\Windows\system32\cmd.exe'. The command prompt is black with white text. The user has entered three commands: '\node\init', 'set PATH=\node;PATH%', and a blank line. The prompt 'C:\>' is visible at the start of each line.

\node\init

Create a test Project

```
C:\Windows\system32\cmd.exe

C:\>\node\init

C:\>set PATH=\node;PATH$

C:\>harp init demo
Downloading boilerplate: https://github.com/harp-boilerplates/default
Initialized project at C:\demo

C:\>
```

harp init demo

Launch the Web Server for this demo project

```
C:\Windows\system32\cmd.exe - harp server

C:\>\node\init

C:\>set PATH=\node;PATH$

C:\>harp init demo
Downloading boilerplate: https://github.com/harp-boilerplates/default
Initialized project at C:\demo

C:\>cd demo

C:\demo>harp server
-----
Harp v0.19.0 - Chloi Inc. 2012-2015
Your server is listening at http://localhost:9000/
Press Ctrl+C to stop the server
-----
```

cd demo

harp server

Visit the Site

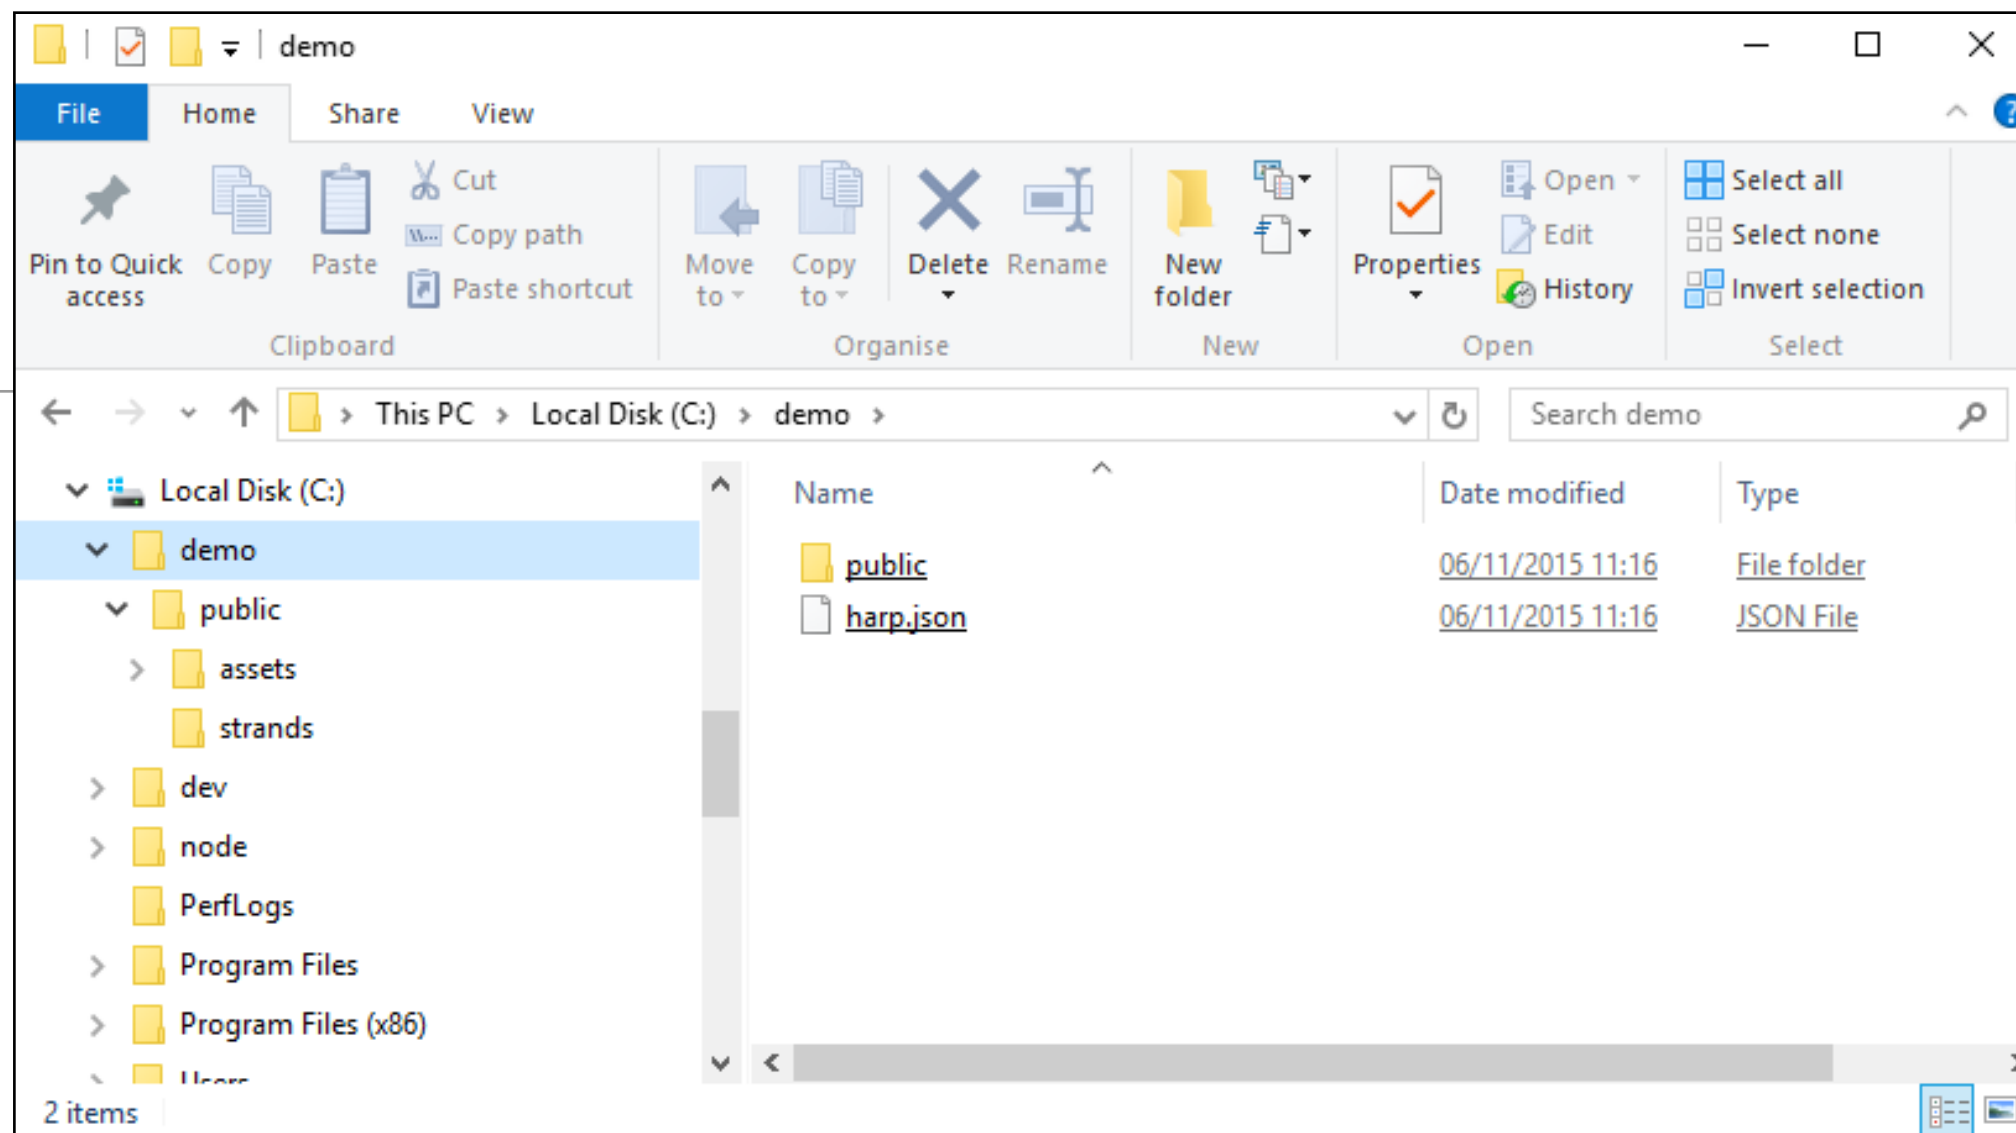

Serve the site from Lab-05b

- Lab-05b generated a web site we will use as an initial test
- Download and expand the archive

Lab-07-a

Explore a web site that embodies many of the techniques we have explored so far. In the lab the web is evolved from unstyled content to a reasonably elegant and clean design - using semantic html element where appropriate.

- Expand the IoT Archive into the demo folder.
- Create an additional file - harp.json

harp.json

```
{  
  "globals":  
  {  
  }  
}
```

Run the harp server again

- harp server

Browse to
localhost:9000

The site is “served”
here and can be
browsed as
expected

The screenshot shows a web browser window with the address bar set to `localhost:9000`. The page displays the Department of Computing & Mathematics logo and the Waterford Institute of Technology name. Below this, it says "BSc (Hons) the Internet of Things". A large banner image features the text "BACHELOR OF SCIENCE (HONOURS) APPLIED COMPUTING IN THE INTERNET OF THINGS" and "Program your World". Below the banner, there is a section titled "Programming" with the text "Learn a broad range of problem solving skills, platforms, software to these skills to build ap device based IoT appl".

In the foreground, a terminal window titled "Select harp server" is open, showing the following commands and output:

```
C:\>\node\init
C:\>set PATH=\node;PATH$
C:\>harp init demo
Downloading boilerplate: https://github.com/harp-boilerplates/default
Initialized project at C:\demo
C:\>cd demo
C:\demo>harp server
-----

Static web publishing *for* Front-End Developers

Zero-bullshit, single-command, bring your own source control web publishing CDN. Yes, it's free.

78,872

deployments

596.64 GB

published

10,809

projects

```
$ npm install --global surge
# In your project directory, just run...
$ surge
```

One Command!

- surge
- Will create an account on first run (remember password) and deploy all files
- Subsequently, will just update site changes.
- Also generates a Domain Name

```
C:\Windows\system32\cmd.exe

^CTerminate batch job (Y/N)? y

  Success! Project is published and running at ceaseless-anger.surge.sh

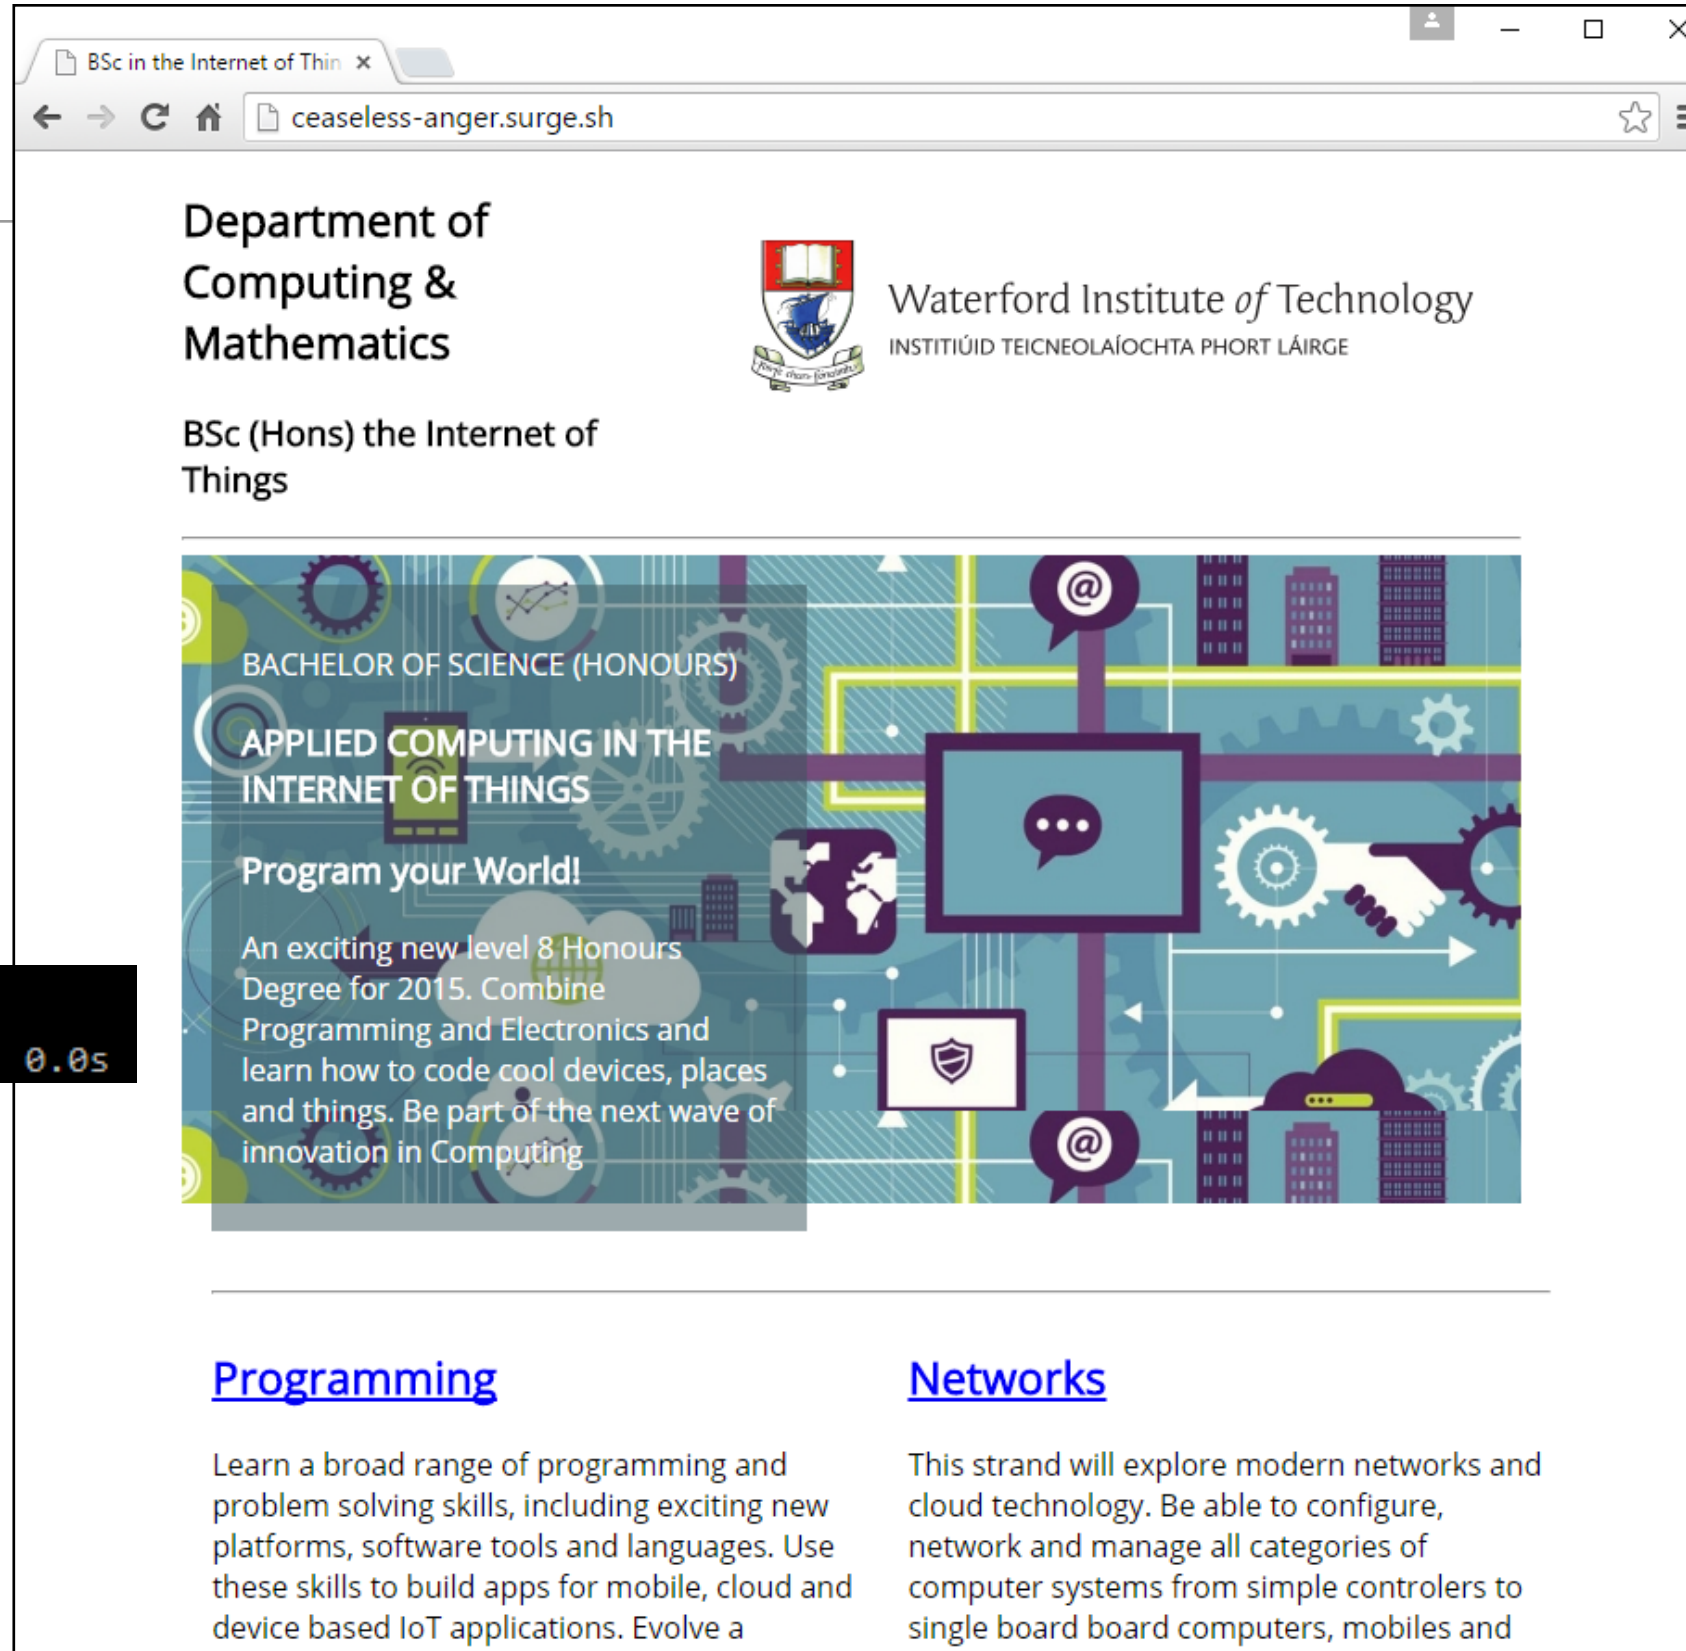

C:\demo>
```

Domain Name

- You can change part of the domain name before publishing

```
size: 34 files, 2.3 MB  
domain: ceaseless-anger.surge.sh  
upload: [=====] 100%, eta: 0.0s
```

- Must end in surge.sh (for free service)

The screenshot shows a web browser window with the address bar displaying "ceaseless-anger.surge.sh". The page content includes the header for the "Department of Computing & Mathematics" at the "Waterford Institute of Technology" (INSTITIÚID TEICNEOLAÍOCHTA PHORT LÁIRGE). Below the header, it states "BSc (Hons) the Internet of Things". The main content area features a large graphic with the text "BACHELOR OF SCIENCE (HONOURS) APPLIED COMPUTING IN THE INTERNET OF THINGS" and "Program your World!". It describes an "exciting new level 8 Honours Degree for 2015" that combines "Programming and Electronics" and encourages students to "code cool devices, places and things". At the bottom, there are two columns of text: "Programming" and "Networks".
